The key to making memory strategies work is to try them out immediately.

What strategy will you use tonight?

Useful ways to speed up memorisation

Learning a language? Label your house! Get a sticky-note pad, and write the translation of many objects in your home and stick them around: your fridge, the mirror, the door (everything). Your home will become an interactive set of notes.

Some great free memorisation apps & websites include:

- Memrise.com
- Quizlet.com
- Duolingo.com

Take the bus to school? Record yourself saying your notes aloud, or some key terms and definitions that you need to memorise. Then listen to them on the way to school or while you go for a jog. All that transit time can be used to reinforce key information.
